Multimedia Appendix 2. Operationalizing dementia staging in the online questionnaire.

Of the following 5 stages of dementia, at which one would you place the person you care for?

- Very mild - e.g. has trouble with work or complicated hobbies (such as wood working, cross stitching, cross word puzzles)
- Mild - e.g. has problems with banking, making meals, playing card games, house work, using the computer
- Moderate - e.g. needs prompting in choosing appropriate clothing to wear, or needing prompting or supervision with personal hygiene
- Severe - e.g. needs help dressing and grooming, walking, going to the bathroom
- Very severe - e.g. able to speak only a few words; mobility is limited, is mostly in bed or a chair
