Clinical vignette (presented after viewing the video)

You are a health professional working in a trauma center of the province of Quebec. You are in the emergency department with a severe traumatic brain injury (TBI) victim. You want to use a reminder to help you provide the best care possible for this severe TBI victim. Within the wiki, “Wiki-Emergency”, a reminder on the initial management of severe TBI in the emergency department created by some colleagues of a Level I Trauma center is available. The references supporting the reminder are available and you even notice that the reminder was revised in October 2009 using the practical guide from the 2007 Brain Trauma Foundation and using the latest evidence-based data found in the literature.

Please take a few minutes to think about the following questions:

1. What do you see are the advantages of using a wiki-based reminder that promotes best practices in the management of victims of a severe traumatic brain injury (TBI) in emergency departments in the province of Quebec?
2. What do you see are the disadvantages of using a wiki-based reminder that promotes best practices in the management of victims of a severe traumatic brain injury (TBI) in emergency departments in the province of Quebec?
3. Who are the individuals or groups of people who could be favorable to you using a wiki-based reminder that promotes best practices in the management of victims of a severe traumatic brain injury (TBI) in emergency departments in the province of Quebec?
4. Who are the individuals or groups of people who could be unfavorable to you using a wiki-based reminder that promotes best practices in the management of victims of a severe traumatic brain injury (TBI) in emergency departments in the province of Quebec?
5. What would help you use a wiki-based reminder that promotes best practices in the management of victims of a severe traumatic brain injury (TBI) in emergency departments in the province of Quebec?
6. What would prevent you from using a wiki-based reminder that promotes best practices in the management of victims of a severe traumatic brain injury (TBI) in emergency departments in the province of Quebec?
7. Are there any other elements that you associate with using a wiki-based reminder that promotes best practices in the management of victims of a severe traumatic brain injury (TBI) in emergency departments in the province of Quebec?
