

1. Install Java 1.6.x from Oracle or the operating system distribution's version of the openjdk. For Redhat Enterprise Linux 5, Java 1.6.0 can be installed with *yum install java-1.6.0-openjdk*.
2. Download the Mirth Connect installer for Unix (at the time of writing, the download link is <http://downloads.mirthcorp.com/connect/2.2.0.5828.b1215/mirthconnect-2.2.0.5828.b1215-unix.sh>).
3. Start the installer with *./mirthconnect-2.2.0.5828.b1215-unix.sh* with sudo or from the root account and click *Next*. Accept the license agreement on the next page and click *Next*.
4. Select the destination directory, such as */opt/mirthconnect*. Click *Next*.
5. Click *Next* on the following screen after leaving all of the components selected for installation.
6. Click *Next* to accept the destination directory for symbolic links.
7. Review the default listing of ports and click *Next*.
8. Review the security settings, adjusting as necessary to meet organizational password requirements and legal requirements. Click *Next*.
9. Review and adjust the directory locations for "Application Data" and "Logs".
10. Click *Next* after leaving the "Install Service" item selected.
11. Deselect the "Yes, I would like to view the readme" box and click *Next*.
