Row	Comment
1	xyk
2	What's missing?
3	We're Listening
4	Checking in
5	Your Group Health Provider thought this would be helpful.
6	Invitation to Online Stress and Mood Management Program
7	Touching base, how can we help?
8	Checking in
9	Just checking in Touching base update me
10	Between Visits Support
11	Strategies and Support
12	"Between Visits Resources" and "Touching Base" feel like they could be personalized messages instead of form letters. I like that.
13	Get extra support from your computer, etc. Also, subjects that imply the provider actually cares like "checking in" are great
14	Really liked "Checking In" and "Touching Base". Feels a bit more personal/about me, yet not as revealing to others that might see the Subject Line.
15	Checking In
16	I do not use this feature enough to comment
17	Practical Skills for Growth During Stress
18	Please take a look, this may be helpful for you.
19	Don't hurt yourself: There's help. [Healthcare Providers Name] wants you to try this. There's at least one person that would miss you! Here's proof. Online support, GH at your own home!
20	Therapy
21	Don't waste this extra support
22	How do you feel today?
23	Touching Base.
24	Depression hurts, we can help
25	Staying Safe at Home/Between Visits

CONTENTFREETEXT: What do you think would get people to visit an Online Intervention? You can make

up your own or copy one from above

Row	Comment
1	xyl
2	The know ledge that the intervention w ill not change any part of yourself or your life unless you allow it -- and it's completely private.
3	I w ould not bother w ith an impersonal online intervention. If the provider thinks there is a problem, I w ould prefer them to contact me personally.
4	That someone cares about you here
5	That this is intended to improve abilities to manage suicidal thoughts
6	Cheap and easily accessible support from doctors and other patients
7	The only way on online intervention w ould help me is if there w as a real person available to chat in real time. When I am feeling this aw ful, w atching videos online is not going to help. Getting an autogenerated message in my inbox w ould actually make me feel w orse because it implies that my provider doesn't care enough to contact me personally if they think there is a serious problem.
8	Your are not alone and you can feel better
9	That this is intended to improve abilities to manage suicidal thoughts
10	"That becoming stronger as a result of life's difficulties is a focus here"--focuses on a really positive goal.
11	That this is professionally made and organized, people care and that this is meant to provide one w ith tools
12	Three points, how ever w orded: There are others you can interact w ith struggling w ith the same issues; You're not alone; and we care.
13	That you w ill be recognized as the best expert on yourself here
14	Others like you are looking for help too and w ill join you.
15	That there are videos of real people sharing their experiences here
16	Avoid using the term "intervention," maybe use something w ith a cheerier connotation. Like "pow -w ow ," "a group of your loved ones online," "a group of friends online," "support group online." The reason is because w hen I hear the term "intervention" is makes me think I'm going to be talked TO, not having an open dialogue. That's just my opinion though.
17	Chat support online
18	Nothing.
19	Let us help now .
20	Support developing life tools.
21	We care about you here and you are not alone
22	That there is a community of people in similar situations/w ith similar experiences as yourself and mental health professionals online w hich you can access at home at any time to find help, support and care
23	That there are videos of real people sharing their experiences here

VIDEO: General Thoughts about the Video

Row	Comment
1	It seems to be a video in the middle of a series. This doesn't feel personalized. It feels like a vague video addressing the surface issues of emotional instability w ith strange, unrelated space-age visual tricks intertw ined.
2	I couldn't concentrate on the message because the background w as kind of psychedelic/trippy. I didn't like the new agey, Sarah McLaclan-ish music.
3	did not get video on page (could not w atch, nothing w as there under "test video below "
4	Interesting special affects, w ith a morbid, sort of depressing tw ist. I w ould have liked to be able to hear the w oman speaking in the video. The music w as too loud to hear her. I'd rather the music be low er and the w oman's spiel louder. That w ould have been more interesting to me.
5	I thought the analogies and descriptions w ere easy to understand, and w hile I don't suffer from bipolar disorder, I identified w ith parts of the video
6	I didn't identify w ith the emotional problems described in the video. It makes a lot of assumptions regarding how the person if feeling. Not everyone w ho self injures or feels like life is not w orth living anymore is impulsive or fluctuates from one emotional extreme to the other. For me personally, I have been feeling bad for over half my life now and have tried over a dozen different meds w ith little success. I see no reason to expect that things w ill ever improve for me.
7	I had to w atch the beginning tw ice to totally understand to number scale. I w as not paying close enough attention the first time. I did enjoy the video overall. The imagery and music w ere quite nice. The video made me feel hopeful like there may be follow -up that w ill allow me to live in "the middle." It also made me feel not so alone. If someone is describing w hat I feel so clearly, other people must be feeling the same way. I didn't love the sauna/ice bath analogy. Analogies are very effective, but I believe a stronger one can be used. Good job over all.

8	The images were odd and not connected well to what was being said. I also think the speaker needed to be identified when she first started talking. I have no idea if she is a researcher, mental health provider or actress. I think the script was good.
9	unappealing visuals
10	I liked the aesthetic, how simply put the ideas were, and the music. It really calmed me down, actually. And I felt validated. I felt like my general existence was at least superficially put up as simply different--rather than "inferior" or "broken."
11	Liked it. It was a very candid and simplified way of understanding this particular state.
12	1) Liked the imagery and music was okay. 2) "subjectively distressing" is wording that comes across incredibly analytical rather than simple understanding, or empathy, or just descriptive of a place the 'consumer/patient' is at. 3) Metaphor of sauna and cold tub seems over used.
13	Watching this video was a very positive experience.
14	it makes very valid points about two polar extremes, but I feel like the animation is too dark for one thing (hard to see, so is the lady speaking) and I felt like it didn't draw me into what was being said, seemed to be a distraction.
15	I like the way this was done. I like that the woman wasn't shown the whole time. Using music, and voice at the same time was good, but I think the music was a little too loud, it was a distraction from the spoken words. The sound would stop then go. Sort of like a hiccup
16	I like the numbers, it makes it feel more concrete. Good and relaxing background music. There were more than one thing that was said that made me think "that's how I feel."
17	Getting therapy is good.
18	I liked the visuals. Had to watch twice to get all the information. The background music felt appropriate.
19	Thought the message went well with the abstract graphics and seemed to convey an understanding of the problems associated with depression.
20	The music was too loud and interfered with my ability to hear all being said. the question being asked was hard to hear and the text was not up long enough to register. for the most part the graphics were interesting, but I tended to look at them rather than listening to what was being said.
21	I liked the music, the film was very artistic and beautifully made. It was hard for me to focus on what the woman was saying. I found the music and the imagery to be a bit distracting and it was taking up most of my attention. I really enjoyed this video overall, but, perhaps it would be more useful to those patients with ADHD or attention problems (like myself) if there wasn't quite as much going on in the background. That being said, I thought that the overall atmosphere of the video was very calm, peaceful and relaxing. I feel like it was easy to watch (as compared with some of the other, more "boring" videos I've seen explaining mental health and emotions) and very well made, brilliantly artistic. I liked the tranquil quality it had.
22	The video didn't work

DATSTAT.STARTDATETIME: The date and time this participant/user began entering data.

Prompt	Count	Pct
Aggregates		
Count		56
Min		2/22/2013 12:43:00 PM
Max		4/12/2013 5:00:32 PM

DATSTAT.ENDDATETIME: The date and time this participant/user finished entering data.

Prompt	Count	Pct
Aggregates		
Count		56
Min		2/22/2013 12:43:00 PM
Max		4/12/2013 5:14:38 PM

DATSTAT.ELAPSEDTIME: The total number of minutes it took this participant/user to finish entering data.

Prompt	Count	Pct
Aggregates		
Count		56
Min		1
Max		138
Sum		728
Mean		13
Std Dev		22.04
Variance		485.56

DATSTAT.SUBMISSIONSTATUS: Describes how the data set was submitted.

Prompt	Count	Pct
Completed	25	44.64%
Partial	31	55.36%
Not started	0	.00%
Terminated	0	.00%

Aggregates		
Count		56
Min		1
Max		2
Sum		87
Mean		1.55
Std Dev		0.5
Variance		0.25

DATSTAT.LOGINCOUNT: Number of times the participant has logged in.		
Prompt	Count	Pct
Aggregates		
Count		56
Min		1
Max		1
Sum		56
Mean		1
Std Dev		0
Variance		0

DATSTAT.JAVASCRIPT: JavaScript enabled?		
Prompt	Count	Pct
No	0	.00%
Yes	56	100.00%
Aggregates		
Count		56

DATSTAT.TIMEPERIOD: The time period of this submission.		
Prompt	Count	Pct
Version 1	56	100.00%
Aggregates		
Count		56
Min		1
Max		1
Sum		56
Mean		1
Std Dev		0

DATSTAT.PCTCOMPLETE: Percent complete.		
Prompt	Count	Pct
Aggregates		
Count		56
Min		0
Max		100
Sum		3002
Mean		53.61
Std Dev		47.74
Variance		2279.26

DATSTAT.LOGINDATETIME: The date and time when this participant last logged in.		
Prompt	Count	Pct

Aggregates		
Count		56
Min		2/22/2013 12:43:00 PM
Max		4/12/2013 5:00:32 PM

DATSTAT.UPLOADDATETIME: The date and time if and when this submission was uploaded.		
Prompt	Count	Pct
Aggregates		
Count		0

DATSTAT.UPLOADUSER: The name of the user who uploaded this submission.	
Row	Comment

DATSTAT.UPLOADTYPE: The type of upload.		
Prompt	Count	Pct
Remote data collection	0	.00%
Imported	0	.00%
Aggregates		
Count		0
Sum		0
Mean		0
Std Dev		0
Variance		0

DATSTAT.NUMPRESENTED: Number of questions presented to the participant.		
Prompt	Count	Pct
Aggregates		
Count		56
Min		1
Max		75
Sum		2794
Mean		49.89
Std Dev		35.35
Variance		1249.88

DATSTAT.NUMANSWERED: Number of questions answered by this participant.		
Prompt	Count	Pct
Aggregates		
Count		56
Min		0
Max		75
Sum		1958
Mean		34.96
Std Dev		35.68
Variance		1273.31

DATSTAT.NUMUNANSWERED: Number of questions unanswered by this participant.		
Prompt	Count	Pct
Aggregates		
Count		56
Min		0

Max	74
Sum	836
Mean	14.93
Std Dev	27.17
Variance	738.25

DATSTAT.PCTUNANSWERED: Percentage of questions unanswered by this participant.

Prompt	Count	Pct
Aggregates		
Count		56
Min		0
Max		100
Sum		2881
Mean		51.45
Std Dev		47.65
Variance		2270.51

DATSTAT.SITE: Participant site at the time when this survey was started.

Prompt	Count	Pct
