Multimedia Appendix 6. User interfaces of the original NoteAid system used in this study and the system with post-evaluation enhancements

Figure A6-1. Comparison of user interfaces of the original NoteAid system and the enhanced system when they are processing the input text

Notes:
① The new system improved clarify of the introduction text for the NoteAid system
② The new system disables and greys out the “simplify” button when the system starts to process the input text and re-enables it after the processing completes
Figure A6-2. Comparison of the original NoteAid system and the enhanced system in displaying system output

Notes:

(a) original system

(b) enhanced system
① The new system improved clarify of the input box label
② The new system keeps the simplify button right below the input box
